

Edge cosmetics was established in 2011 to meet a growing market need for quality, all natural, chemically free cosmetics. Realising that there is an increasing awareness amongst women on the dangers of toxic chemicals contained in regular cosmetics, the owners (Shannon & Kylie) researched the market to source the ingredients used in all Edge Cosmetic Products.

A key factor in their research and approval was that all ingredients should be natural, organic, healthy and have never been used in any form of animal testing. All Edge Cosmetics Products have met these key criteria and ensure that the entire range of cosmetics are healthy for all applications in the day-to-day lives of women Australia wide.

Edge Cosmetics does not sell our products direct to the general public or resellers. Our products are distributed by the following authorised distributors and or their designated Sales Agents.
